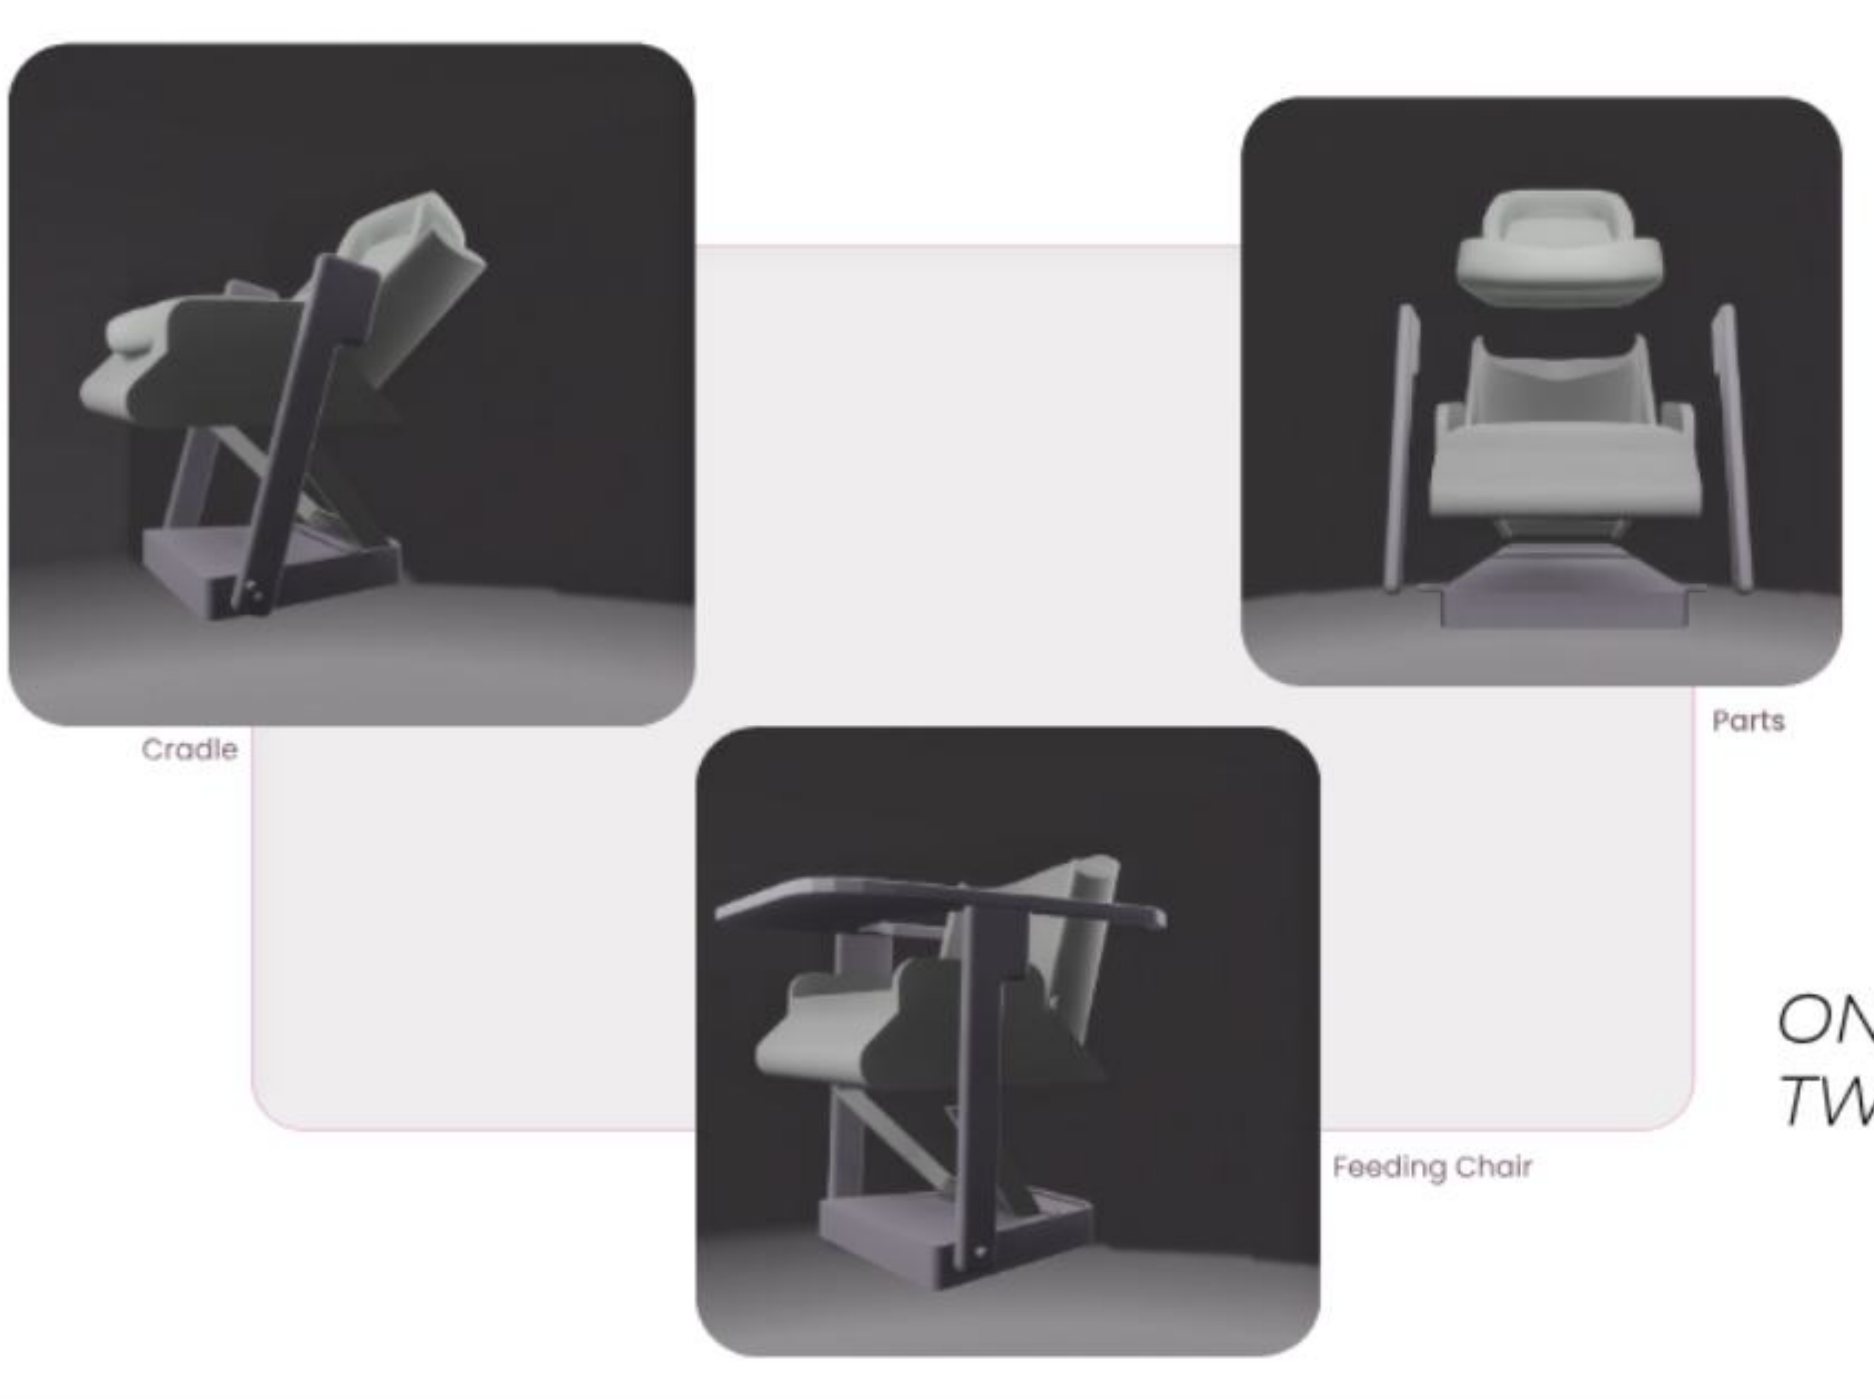
COZY GROW

SUSTAINABLE PRODUCT

A convertible baby product that grows from a cradle into a feeding chair.



Context

The Cozie Grow uses a simple mechanical adjustment system supported by pivot rods and stoppers that enable easy transformation between the cradle and feeding chair modes.

ONE PRODUCT,
TWO STAGES

Reasearch

- Conducted primary research through 15 parent interviews and a Google survey with 70+ respondents.
- Observed children and parents interacting with existing cradles and baby furniture to understand usage behaviour and pain points.
- Conducted competitive benchmarking of 10+ existing baby cradles and convertible furniture across functionality, ergonomics, adjustability and longevity.
- Created User Journey Mapping and Empathy Mapping to identify key parent needs, challenges and opportunities for product improvement.

Short product lifespan

Extended usability – Adapt the product for the child's next growth stage.

02

Need for multiple products

Multi-functional design – Combine cradle and feeding chair functions.

03

High overall cost

Cost-effective design – One product should serve multiple purposes.

04

Limited space

Space-efficient design – Transform one product instead of adding another.

05

Safety during conversion

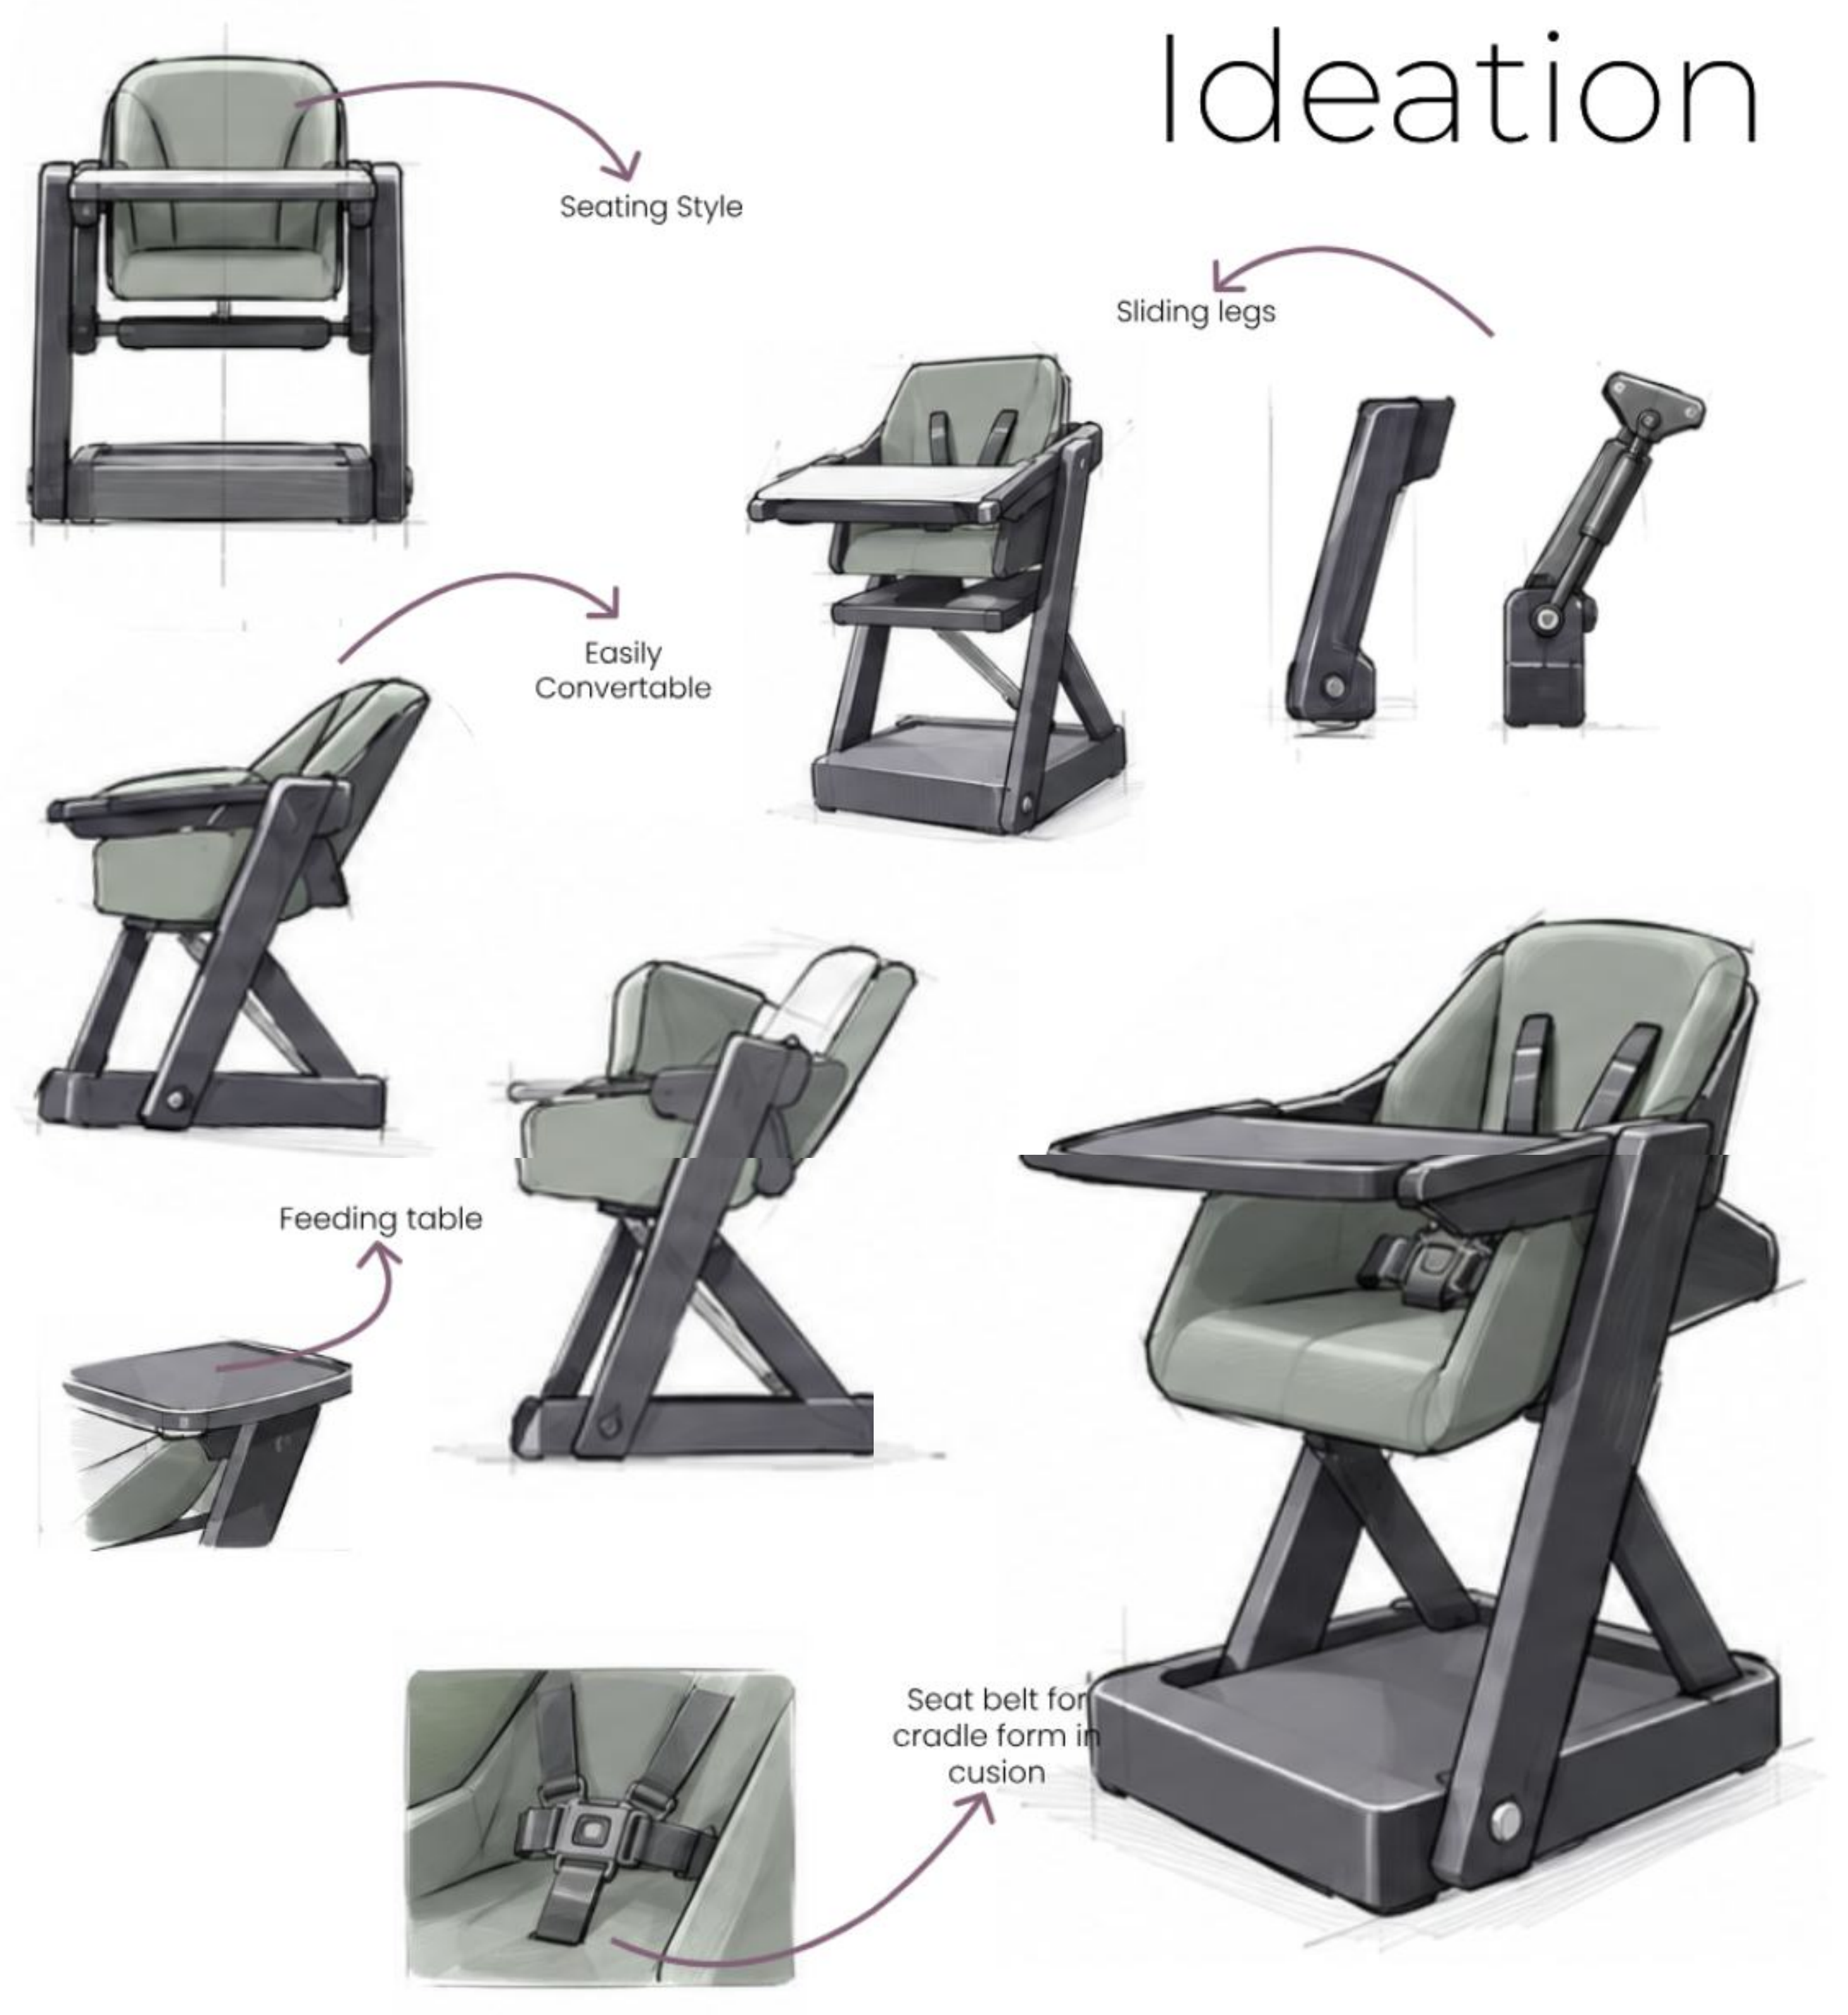
Secure mechanism – Use reliable locking, stopper and support systems.

06

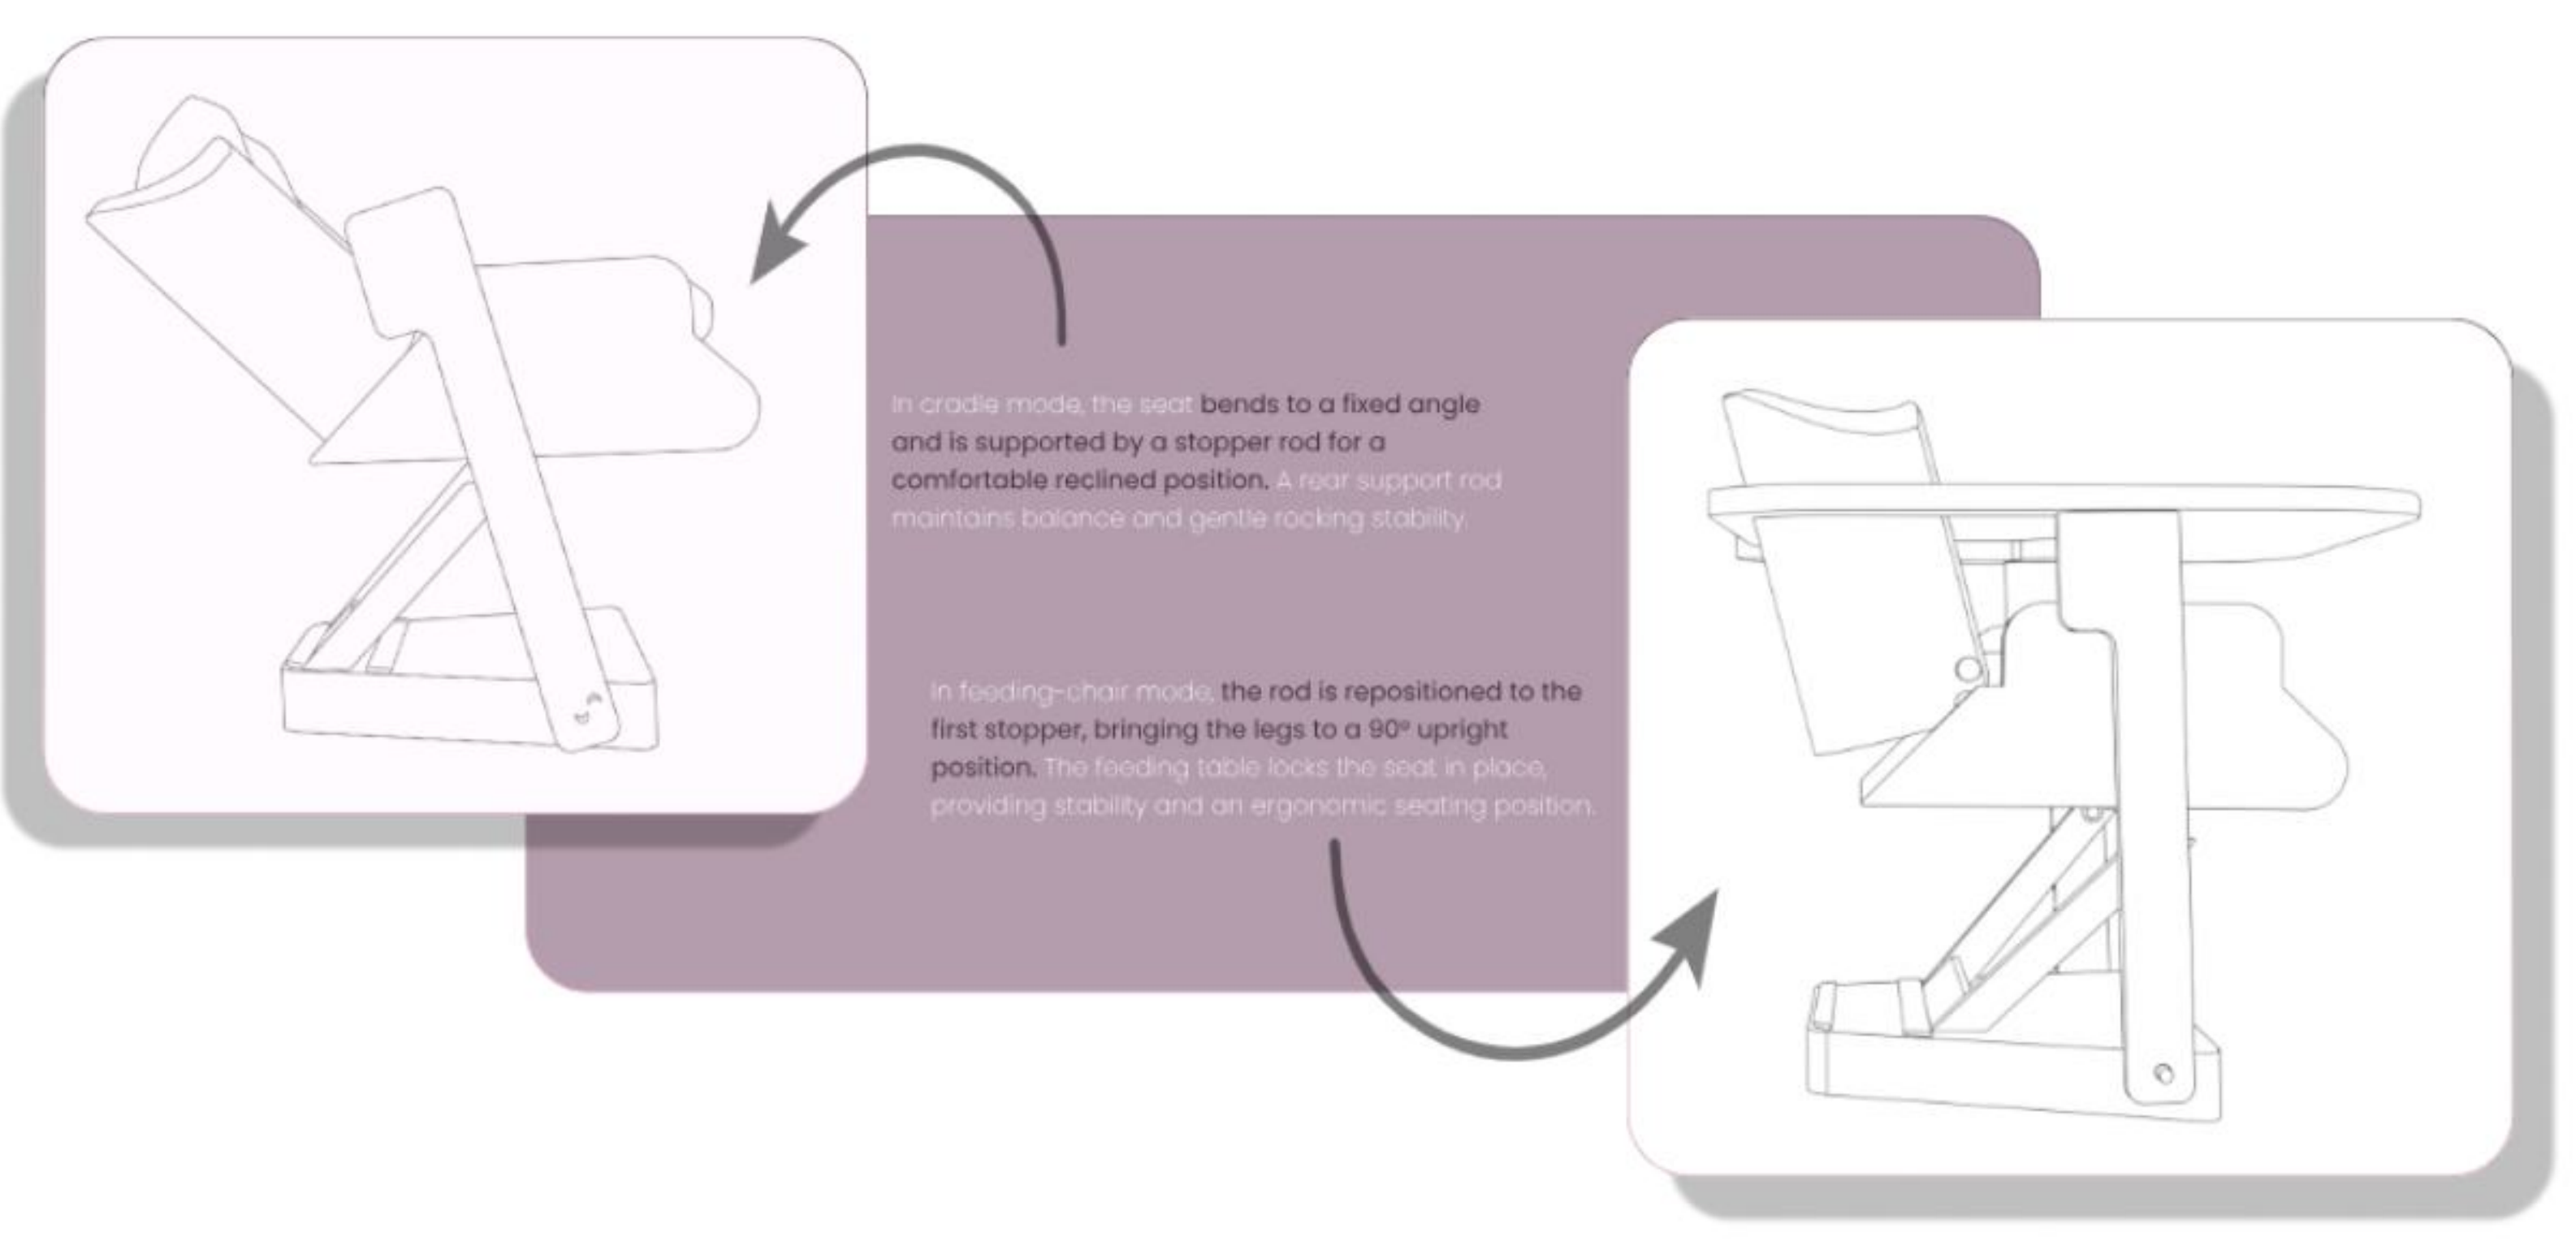
Product wastage

Sustainable design – Extend the product's life through a second function.

Ideation

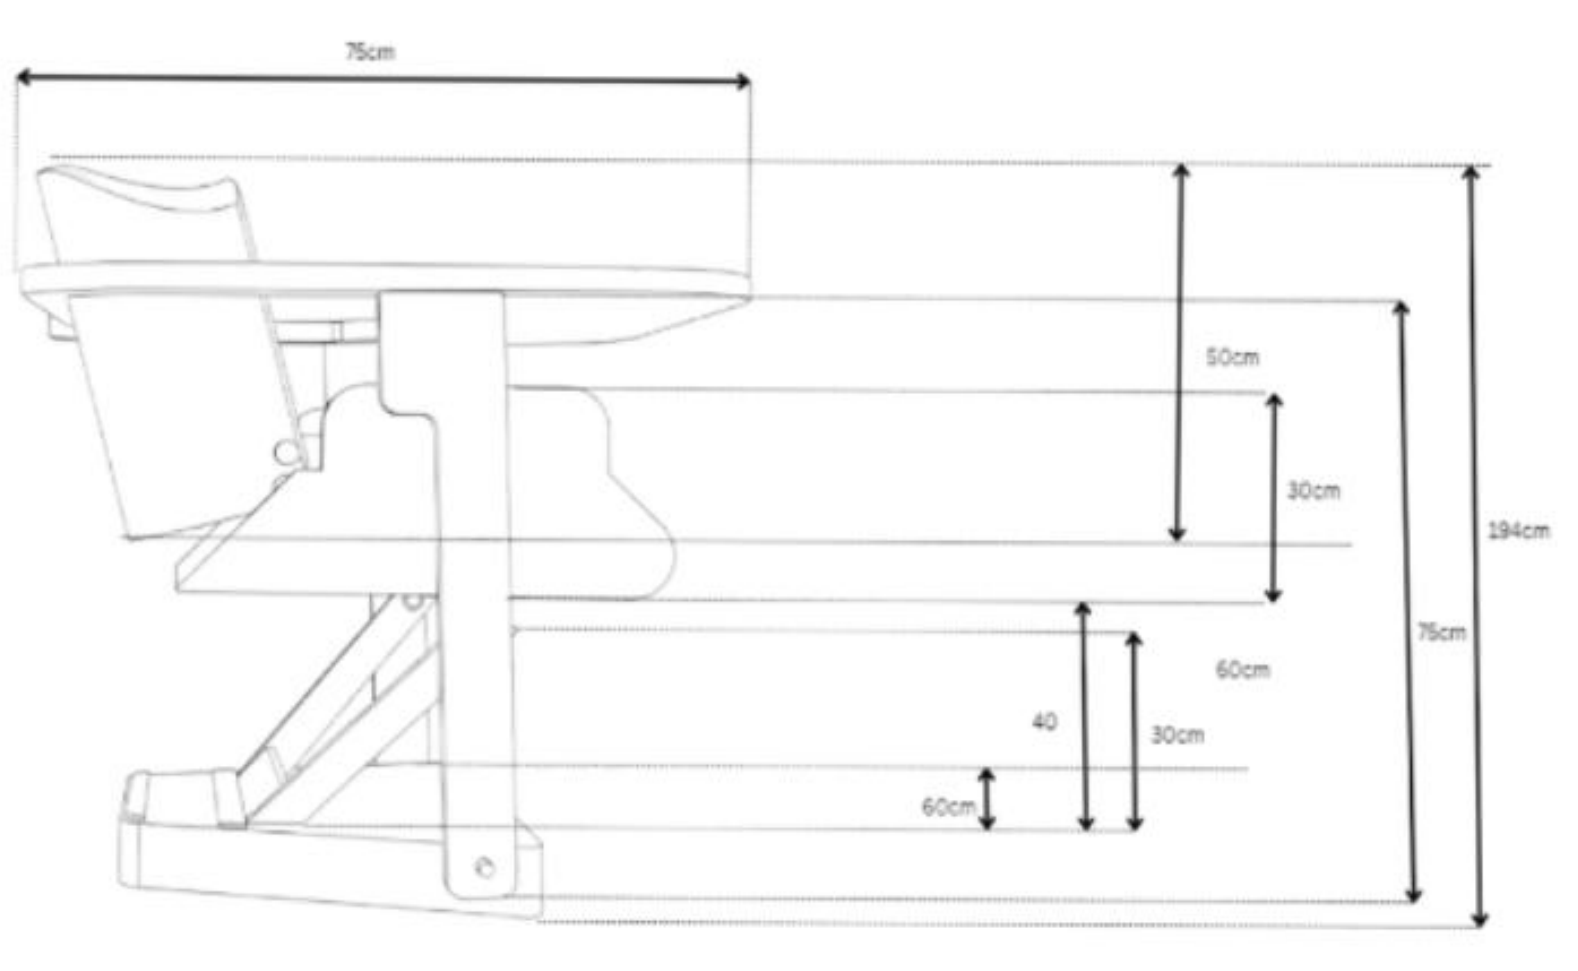


Mechanism

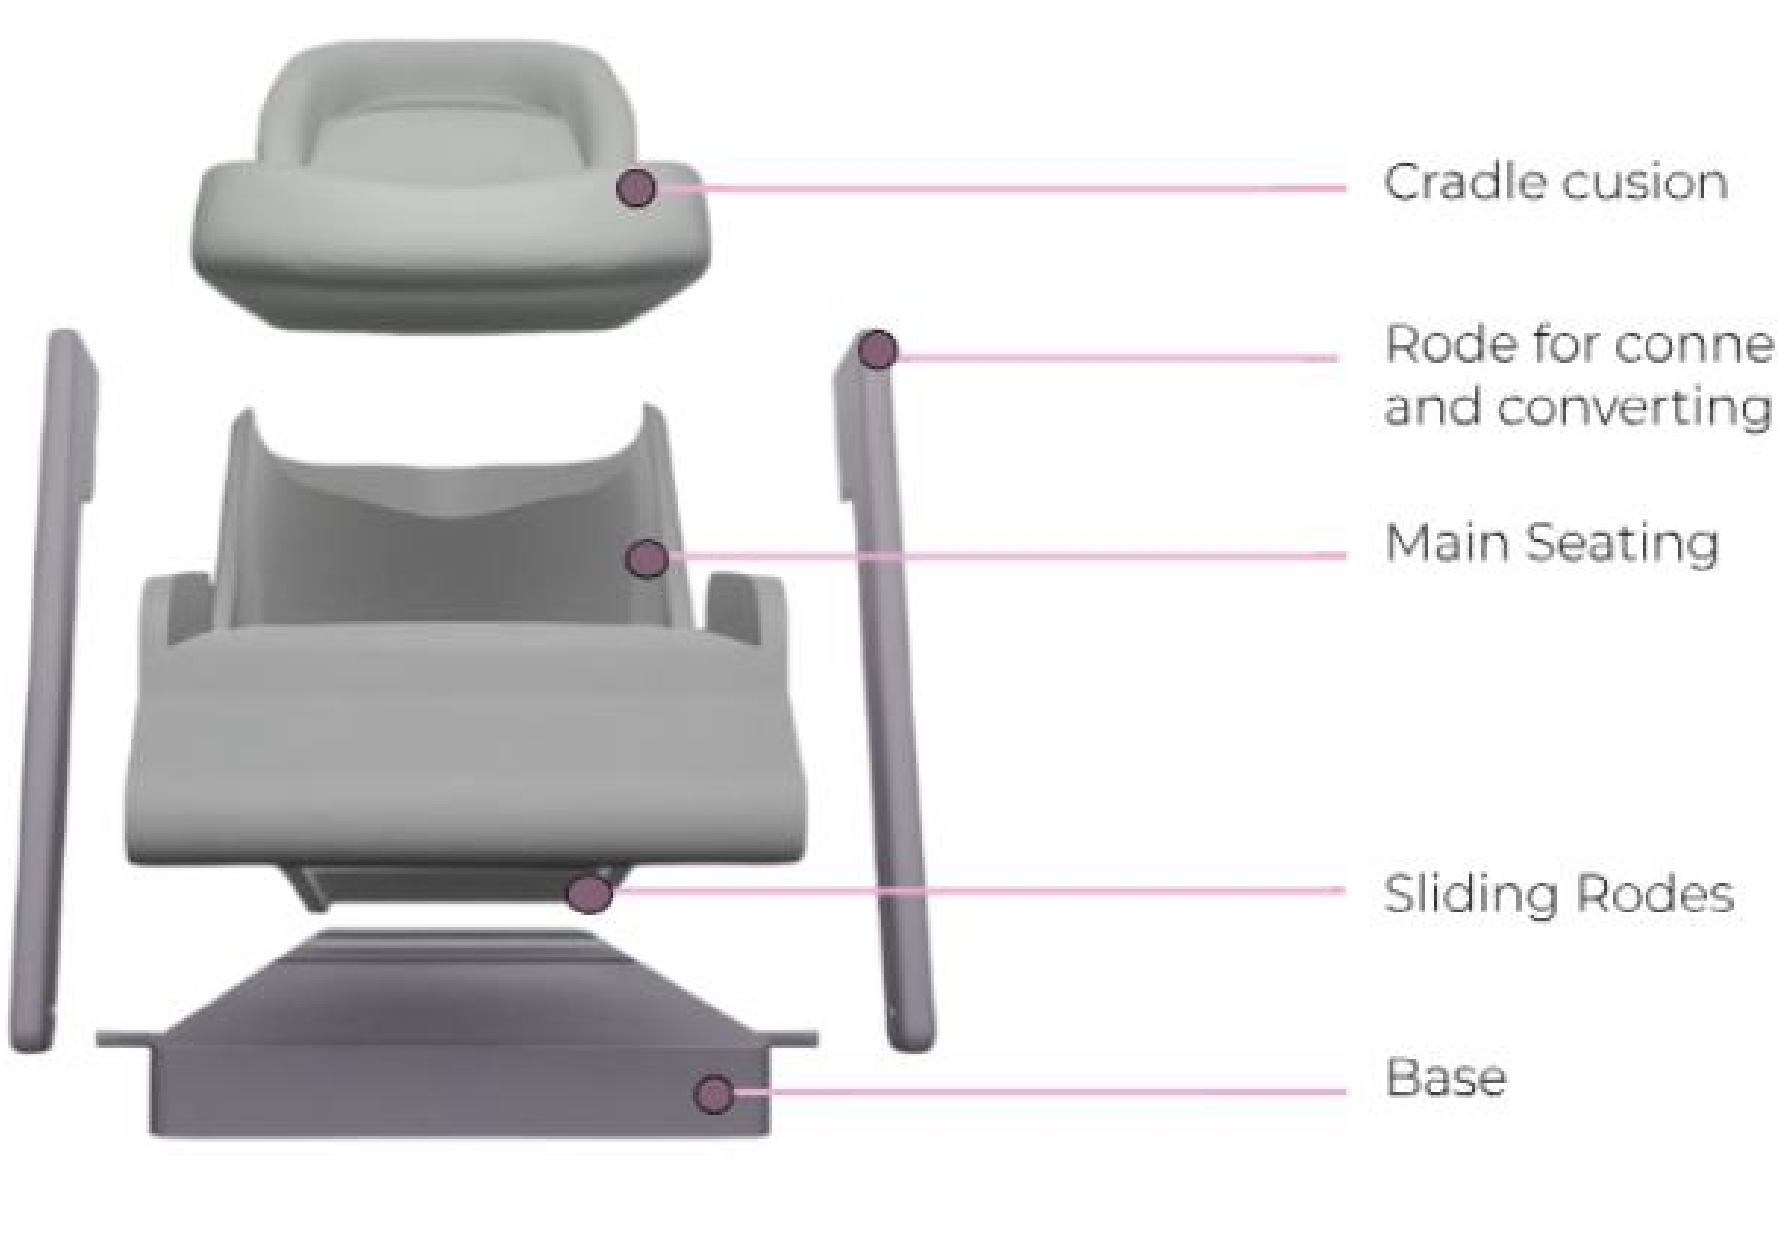


In cradle mode, the seat bends to a fixed angle and is supported by a stopper rod for a comfortable reclined position. A rear support rod maintains balance and gentle rocking stability.

In feeding-chair mode, the rod is repositioned to the first stopper, bringing the legs to a 90º upright position. The feeding table locks the seat in place, providing stability and an ergonomic seating position.



Feeding chair is used from the age of **6 months to 3-4 years** since the **product durability has been increased the product is considered as sustainable** because the user is who is supposed to through this product after 6 months and get a feeding chair after that uses the same product.



Material

Plywood

Painting
- Wood primer
- Enamel paint (white, violet)
- Sand paper
- Thinner (to make the paint)
- Acrylic wall putty
